Chapter 1

Namespace Index

1.1 Package List

Here are the packages with brief descriptions (if available):

ChessEngine	7
ChessEngine.AI	7
ChessEngine.AI.Doofus	7

Chapter 2

Hierarchical Index

2.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

ChessAI	
ChessEngine.AI.Doofus.DoofusChessAI	9
ChessEngine.AI.Doofus.DoofusChessAI.ValidMoveEntry	11

Chapter 3

Class Index

3.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

ChessEngine.AI.Doofus.DoofusChessAI	
Doofus chess AI	9
ChessEngine.AI.Doofus.DoofusChessAI.ValidMoveEntry	11

Chapter 4

Namespace Documentation

4.1 ChessEngine Namespace Reference

4.2 ChessEngine.AI Namespace Reference

4.3 ChessEngine.AI.Doofus Namespace Reference

Classes

- class [DoofusChessAI](#)
Doofus chess AI.

Chapter 5

Class Documentation

5.1 ChessEngine.AI.Doofus.DoofusChessAI Class Reference

Doofus chess AI.

Inheritance diagram for ChessEngine.AI.Doofus.DoofusChessAI:

Classes

- class [ValidMoveEntry](#)

Public Member Functions

- [DoofusChessAI](#) (ChessColor pTeam)
The constructor for [DoofusChessAI](#).
- override void **OnUpdate** ()
Invoked after every 'Update' call. Useful for executing any logic every frame. Recommended [AI](#) best move determination logic is here, you can use 'IsBestMovePending' to check if there is a best move to limit planning time only to during best move requests.
- override void **OnBestMoveRequestUpdate** ()
Invoked after every 'OnUpdate' in any frame where 'IsBestMovePending == true' and 'IsBestMoveDelayed == false'. Logic to determine best moves should not be executed in this loop as a submission delay causes it to not be executed. It is best practice to submit ready best moves in this callback unless they were demanded, this will prevent any non-demanded submissions while there is a best move submission delay set.
- override void [OnBestMoveRequested](#) (int pMaxDepth, float pMaxTime)
Invoked when a best move is requested.
- override void **OnBestMoveDemanded** ()
Invoked after the [AI](#) demands a best move be submitted immediately.
- override void [OnBestMoveSubmitted](#) (TileIndex pFrom, TileIndex pTo)
Invoked after the [AI](#) submits a best move.

Protected Member Functions

- void **SubmitBestMove** ()

Determines and submits a 'best move' instantly.

5.1.1 Detailed Description

Doofus chess AI.

Doofus is not very bright, he will always make a tit-for-tat trade, he will never pass up an opportunity to take a piece, and he rarely makes the best possible move. Doofus does not hesitate and always moves quickly.

5.1.2 Constructor & Destructor Documentation

5.1.2.1 DoofusChessAI()

```
ChessEngine.AI.Doofus.DoofusChessAI.DoofusChessAI (
    ChessColor pTeam )
```

The constructor for [DoofusChessAI](#).

Parameters

<i>pTeam</i>	The team the AI is playing as.
--------------	--

5.1.3 Member Function Documentation

5.1.3.1 OnBestMoveRequested()

```
override void ChessEngine.AI.Doofus.DoofusChessAI.OnBestMoveRequested (
    int pMaxDepth,
    float pMaxTime )
```

Invoked when a best move is requested.

Parameters

<i>pMaxDepth</i>	
<i>pMaxTime</i>	

5.1.3.2 OnBestMoveSubmitted()

```
override void ChessEngine.AI.Doofus.DoofusChessAI.OnBestMoveSubmitted (
    TileIndex pFrom,
    TileIndex pTo )
```

Invoked after the [AI](#) submits a best move.

Parameters

<i>pFrom</i>	
<i>pTo</i>	

The documentation for this class was generated from the following file:

- DoofusChessAI.cs

5.2 ChessEngine.AI.Doofus.DoofusChessAI.ValidMoveEntry Class Reference

Public Attributes

- ChessPiece **piece**
The ChessPiece that can be moved.
- ChessTableTile **moveTo**
The ChessTableTile the piece would be moving to.

The documentation for this class was generated from the following file:

- DoofusChessAI.cs
